SUMMARY

Software Engineer with 4+ years of frontend experience building production applications with React, TypeScript, and JavaScript. Pursuing MS ITM at UT Dallas seeking Summer 2027 Software Engineering internships.

EDUCATION

The University of Texas at Dallas, Dallas, TX **Aug 2026 - May 2028**

Master of Science, Information Technology and Management
Coursework: Database Management, Systems Analysis and Project Management, Object-Oriented Programming in Python

Visvesvaraya Technological University, Mangaluru, IN **Jul 2017 - Aug 2021**

Bachelor of Engineering, Computer Science
Coursework: Data Structures & Algorithms, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

Senior Software Engineer, Frontend - ZEE Entertainment **Jan 2025 - Jun 2026**

- Built **2026 FIFA World Cup subscription and payment flows** supporting **~6M opening-weekend viewers**
- Redesigned search & recommendations, lifting **click-through rate 7%**; finance reported **~$360K** incremental **profit** in 3 months
- Architected **React/TypeScript platform adapters**, enabling one shared application across **10+ TV platforms**
- Implemented **GraphQL APQ** with automatic fallbacks, reducing API request sizes and network usage
- Engineered **spatial navigation and focus management** across grids, carousels, modals, and overlays
- Built **config-driven Mixpanel/GA4 telemetry**, reducing analytics payload size **35%** while preserving event coverage
- Conducted **code reviews** and fixed playback initialization sequencing, restoring **reliable playback** across TV platforms

Software Engineer, React - Straumann Group **Aug 2023 - Sep 2024**

- Led **micro-frontend** migration, enabling independent deployments through **CI/CD pipelines** and shared application contracts
- Introduced **self-service localization**, enabling product teams to manage translations across **6+ markets**
- Established frontend **performance guardrails**, reducing load times by 25% and preventing performance regressions
- Increased unit test coverage from 58% to 82% using Jest, React Testing Library; added Cypress end-to-end tests
- Proposed and prototyped an **AI-powered implant-success predictor** for clinical treatment planning
- Designed a **config-driven React form** engine with **validation rules**, collaborating with designers and backend engineers

React Engineer, Technology - Virtusa **Nov 2021 - Aug 2023**

- Standardized **WCAG accessibility** across **3+ healthcare apps**, improving **cross-browser usability** and reducing defects
- Improved FCP by 20% and LCP by 18% through critical-rendering-path optimizations, accelerating page loads
- Developed reusable **onboarding tours** with behavioral analytics, reducing user drop-offs by 10%
- Built **AI-assisted rich-text editing** with Grammarly and live scoring, streamlining **report creation**

SKILLS

Languages: JavaScript, TypeScript, Python, SQL
Frontend: React, Redux (state management), React Hooks, MUI, styled-components, HTML5, CSS3, Responsive Design
APIs & Architecture: GraphQL, REST APIs, Micro-frontends, Axios, Internationalization (i18n/l10n)
Testing: Jest, React Testing Library, Cypress
Performance & Accessibility: Core Web Vitals, Web Performance Optimization, WCAG Accessibility
Tools: Git, Webpack, npm, Docker, CI/CD, Azure DevOps, Jira, Figma

PUBLICATIONS, HONORS, AND CERTIFICATIONS

Oracle Certified Associate, Java SE 8 Programmer
Most Promising AI, Straumann Inno Week - Smart Treatment Plans
“CANFOOD: An Android Food Ordering Application for College Cafeteria,” IJIRSET, 2021
